Tomas Fontanarrosa

Software Engineer

💬 SUMM

Software Developer with 7 years of experience in delivering high-performance backend solutions and enhancing user experiences through innovative full-stack development. Expertise in Java, microservices architecture, and agile methodologies drives the successful execution of complex projects that align technical capabilities with strategic business objectives. Proficient in fostering collaboration within cross-functional teams, ensuring timely delivery while maintaining high code quality. Committed to continuous learning and adaptation in rapidly evolving environments, consistently leveraging advanced technologies to create efficient, scalable applications.

💼 EXPR

2022-02 - present

Senior Software Developer

eDreams ODIGEO, Barcelona

Working as a Java Backend Software Developer at eDreams ODIGEO, a major online travel agency based in Barcelona, Spain. Involved in the development of scalable, high-performance backend services using Java and microservices architecture. Actively contribute to translating business ideas into practical and actionable technical initiatives, ensuring alignment between product vision and engineering execution.

2020-12 - 2021-06

Full Stack Developer

Primero Systems, San Diego (Remote)

Worked as a Full-Stack Developer focusing primarily on the development of a back-office system for Midwest Laboratories, a client based in Nebraska, USA. The application was built using .NET Core 5, React, and PostgreSQL, supporting critical administrative and operational processes within the laboratory.

2019-08 - 2020-11

Full Stack Developer

Oz Digital Consulting, Miami (Remote)

Part of the development team for SandDollar, an application developed for Royal Caribbean. The project consists of several interconnected modules designed to manage all commercial operations on a private island in the Bahamas, including retail, dining, reservations, and guest services.

2017-12 - 2018-12

Full Stack Developer

Crucijuegos, Rosario, Argentina

Collaborated within a 4-person team to develop a desktop application using magnetic card technology for accurate employee working hours monitoring. Additionally, developed a web-based administration system to configure sales stands and generate detailed commercial financial reports.

2016-10 - 2017-11

Junior Java Developer

Globant, Rosario, Argentina

⚓ INTR

Passionate about running and staying physically active through outdoor sports such as kitesurfing and camping. Enthusiastic about motorcycle maintenance and repair, combining hands-on mechanical skills with a love for two-wheel adventure. A strong interest in wildlife and nature exploration, often seeking opportunities to disconnect and reconnect with the outdoors. Additionally, I actively follow geopolitics, with a focus on global affairs, economic trends, and their influence on technology and international markets.
